

MetalIK Inkjet

High-Tack Printable Metallic Films

KERNOW JET®

LATEX, SOLVENT & UV

Certified for
HP Latex Inks

Applications

- Metallic Silver, Gold or Rose Gold lamination on boards and smooth surfaces
- POS decoration with or without print
- Ideal for shop-fitting, perfumeries, luxury boutiques, Christmas campaigns
- Turn any smooth surface into metallic
- Ideal for packaging with metallic effect, our silver film is recommended for Color Logic® software
- Combine permanent print and CAD applications

Benefits

- Single side bright shiny Silver, Gold, and very trendy Rose Gold
- Perfect film for lamination on boards, for example Dibond
- Very smooth finish, close to mirror effect
- High-Tack adhesive for strong permanent adhesion
- Can be cut and weeded
- Corrosion free for outdoor durability
- Silver film up to 3 years outdoor use without fade, Gold & Rose Gold 1 year outdoor use

Post Printing Information for Latex & Solvent Inks:

As with all filmic media, this product must be allowed to “gas-out” after printing. This can be achieved by leaving the prints face up, ideally 24+ hours, to set, dry and harden. If unable to do this e.g. with a long print run: after printing the roll stand it vertically and loosely unwind the printed roll as much as possible, to allow air in and gases/solvents out.

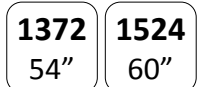

Recommended Conditions:

Printroom	59°F - 85°F 15°C - 30°C	30% - 65% RH
Usage	-40°F - 176°F -40°C - 80°C	10% - 90% RH
Storage	50°F - 68°F 10°C - 20°C	20% - 50% RH
