PermaGard® Anti-Graffiti Films

Optically Clear Permanent Protection Film

What are Anti-Graffiti films?

SAG 38 1.5 mil Promotional Optically Clear PET

Perfect promotional anti-graffiti laminate for graphic images. Optical clarity allows for perfect see-thru when laminated over perforated window films.

SAG 53 2.0 mil Intermediate Anti-Graffiti Film

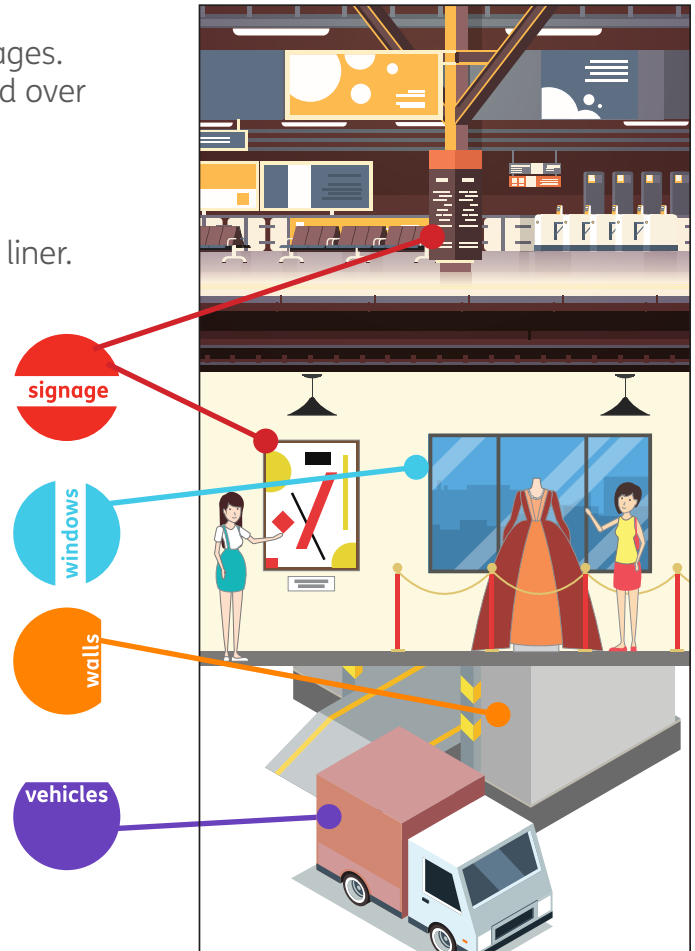

Optically clear hard-coated gloss PET with optically clear permanent acrylic adhesive and 78# smooth white Kraft liner.

Where to use Anti-Graffiti Films:

SAG 38 & SAG 53 are lamination films developed to typically protect graphic images that require graffiti protection. Application with a professional laminator is required. These films are intended for graphics on smooth flat surfaces.

SAG 53 is hard coated and can be used to protect glass surfaces from vandalism and physical abuse including graffiti, scratches and gouging.

Graffiti can be quickly removed from all the SAG films with the use of acetone, methyl alcohol and most other graffiti removal products available on the market today.

Product Part #	Roll Size	Face	Permanent Adhesive	Liner	Indoor/Outdoor Durability
